

17 October 1969

Dear Les:

Here is a marked-up copy. I hope you can decipher the suggested changes. Most of them are sort of self-explanatory, but a few, like placing current production assessment in task 3, might need explanation. My reasons for doing this are two: first, cooperation by the community is necessary for feasibility and, second, I don't feel that the main thrust towards the proper specification of needs should be diluted. With respect to adding me to the Steering Group, there may be some question but I would like it and I think I could be very helpful to the effort.
